

Unit 04 — Map — how the pattern runs

Weeks 7–8 · Intermediate level

Duration	Weeks 7–8
Level	Intermediate level
Delivery	Online study, one live lab each week, small-group practice
Assessment	Written work reviewed by Prof. Oprea; unit 08 adds the case study and oral assessment
Tuition	Included in the programme tuition of \$1,799 — or 6 monthly instalments of \$300
Cohort size	Small groups, so every session gets attention

Overview

Precision NLP applied to sequence analysis: the trigger, the internal representation, and the exception that proves the pattern is not constant.

Learning objectives

- Map the structure of a repeating pattern
- Locate the exception
- Select an accurate point of interruption

Prerequisites

- Enrolment in a current cohort
- Unit 03 — Name — the problem in the client's words, including its written work

Core concepts

Trigger · internal representation · exception · linguistic precision

Applied component

Map five patterns in writing. One of them is your own.

Founded and taught by Prof. Catalina A. Oprea. The Certificate of Completion is issued by Hermes University Rome and signed by Prof. Oprea. It is a private professional certificate: it is not a government licence and does not replace any registration you need locally in order to practise. Questions: support@thekuremethod.com
